The Lawyers of Sanet Legal & Accountancy are characterized by their entrepreneurial thinking in their legal advice.

We see it as our task to define and implement the economic goals of our clients in a legally clean manner. This starts with the right set-up of the company formation and the corporate structure and leads to investing in Thailand for foreigners and BOI application, as well as to labor law and visas or work permits Thailand.

Our lawyers always coordinate with our management consultants at Sanet ASIAN ADVISORS. This is one of the things that makes Sanet so special.
